

# Grade Recovery (1st Semester)

Please read the information below concerning Course Recovery:

For those of you who are unfamiliar with grade recovery, the learning platform we will be using is called Edmentum, also known as (Plato). After signing in to Clever from Portal, you can click on the

icon named Edmentum which appears as a (black E with a rainbow) on it.

This credit recovery program is self-paced, which means for some of you, only a few weeks will be necessary to earn a replacement grade for 1st semester. Remember though...we only have until the end of May in Course Recovery, so you must make it through the course within that time frame. Please stay diligent in your effort to complete activities and mastery tests. Below are some helpful tips on getting through the program quickly:

- Pretests are very important. There is always a pretest at the beginning of each unit. The better you perform on pretests, the less work you will have to complete in the unit. Many of the mastery tests become exempted, and are labeled as such with a blue E.
- Tutorials are meant to help you gain the knowledge necessary to pass the mastery tests. You need an 80% or better on mastery tests to pass them. If you do not attain a passing score on the mastery test and it becomes locked, you can reopen the mastery test and take it again by going back through the tutorial. Enter new answers in the tutorial and go through it again. This should unlock your mastery test. You can do this multiple times to pass the mastery test if necessary. While guess/check/revise is a useful strategy, it is time consuming trying to guess your way through mastery tests. You will move quicker through the program by trying to learn the content instead of trying to guess at it.
- **IMPORTANT:** Commit to a daily schedule so that you will complete the course within the 4-month window.
