RELEVANT INFORMATION REGARDING EXTRACURRICULAR ATHLETICS

Students who move during the school year may remain at the current school until the end of that school year. Contact school administration for details.

Participation in extracurricular athletics is voluntary and carries certain inherent risks and possibilities of serious injury and even death. I understand the possible risks, and that medical expenses resulting from injuries incurred during District or school sponsored extracurricular athletics are the responsibility of the parents/guardians of the student(s).

Transportation of students participating in extracurricular athletic competitions, practices and other District or school sponsored athletic events will not always be provided or arranged by schools or the Pinellas County School Board.

I hereby agree to waive, release, discharge, indemnify, and hold the school and the Pinellas County School Board harmless from any and all liability for any injury or illness of the above named student(s) including death, or for claims of any nature which may result from transportation of the student(s) to District or school sponsored extracurricular athletic competitions, practices and other District or school sponsored athletic events that is provided or arranged by the student or their parents or guardians.

I agree to indemnify and hold harmless the School and the Pinellas County School Board from claims of any nature including costs, expenses and fees arising out of or as a result of the participants actions during this voluntary activity.

Each student participating in District sponsored Extracurricular Athletics is required to purchase mandatory student accident insurance from the insurance carrier currently contracted with the Pinellas County School Board. This is not intended as primary insurance. This requirement CANNOT be waived, and the insurance must be purchased before any level of participation can occur. Proof of purchase of the appropriate student accident insurance coverage from the currently contracted insurance carrier must be attached to this form.

Failure to purchase the appropriate student accident insurance policy, or, failure by the Pinellas County School Board to verify that this requirement has been met, does not transfer responsibility for payment of any and all injury related claims and expenses, from the student/parent/guardian to the Pinellas County School Board.

Football players cannot alter, in any way, protective gear. Any alterations must be made with the permission of the head coach and must be within the approved specifications of the equipment manufacturer.

A certified Athletic Trainer will be assigned to each school and will attend all football games and can treat students from any school.

A student who transfers from one school to another during the school year must follow the transfer process, except as otherwise allowed by law. See FHSAA bylaw 9.3 Transfers.

Eligibility requirements are designated by the FHSAA and the Pinellas County School Board adopts such requirements as it's own. It is the student's responsibility to confirm his/her eligibility prior to trying out for a team or investing money in insurance.

Participation in extracurricular athletics is a privilege and can be suspended or revoked by the school's administration when deemed necessary.

A student who accepts a position as a member of an athletic team shall be considered a member of that team until the team has completed the final competition in which it is eligible to participate, including all playoff games. Any student who leaves the team for any reason prior to the end of the season shall be ineligible to participate in any other sport until the season of the team she/he left has been completed, except as otherwise allowed by law.

An athlete must be in good standing with the team and the school at the completion of the sport season to be eligible for a letter or any other award. The athlete must meet county and the FHSAA requirements in order to receive a letter or award. A student who leaves the team early or does not participate through the end of the season will not be considered in good standing.

Athletes and teams that qualify to advance in the state series playoffs must participate on the next level of competition qualified for or be assessed a fine from the FHSAA. An athlete that fails to participate in a state series playoff after qualifying will be considered "not in good standing" and therefore not qualified to letter or receive awards.

Relevant information regarding extracurricular athletics.

Students may use the school choice options approved in School Board Policies 5120 - Assignment of Students and 5210.01 – Controlled Open Enrollment to attend a non-zoned school. Once a student is assigned to a non-zoned school the student is eligible to participate in athletics immediately, provided they have not participated in the same sport and the previously attended school in the same year, except as otherwise allowed by law.

An athlete who is ejected or disqualified for unsportsmanlike conduct will not participate in or represent the school in any future athletic contests until all fines assessed have been paid to the school.

FLORIDA HIGH SCHOOL ATHLETIC ASSOCIATION, INC. REGULATIONS IN BRIEF

Academic Eligibility:

- An incoming 9th grade student must have been regularly promoted to be eligible during the first semester.
- Eligibility is based on an unweighted cumulative GPA in all courses taken since first entering the 9th grade.
- Eligibility status is determined at the end of each semester (18 weeks) to determine if a student is eligible or ineligible. This means a student who maintains a cumulative 2.0 grade point average is eligible for an entire semester (18 weeks). If a student does not maintain a cumulative 2.0 grade point average, he/she is ineligible for an entire semester (18 weeks). This applies to 11th and 12th grade students.
PLEASE CONTACT YOUR SCHOOLS' ASSISTANT PRINCIPAL FOR ACTIVITIES OR YOUR SCHOOLS' ATHLETIC COORDINATOR IF YOU HAVE QUESTIONS.

A student will be ineligible if they reach the age of 19 years before September 1st.

Students have four consecutive years of high school eligibility from the date they first enter the 9th grade. Beginning with students entering grade 9 in 2018-2019, and thereafter, a student who reached 19 on or after September 1st, and who has not exceeded his/her four year limit of eligibility, may participate in Interscholastic athletics during that school year.

Physical Evaluation: The annual physical evaluation must be administered either by a licensed physician, a licensed osteopathic physician, a licensed chiropractic physician, a licensed physician assistant, or a certified advanced registered nurse practitioner. A physical evaluation is valid for one year (365 calendar days) from its date. For example, if a physical is on May 1 it is valid through the following April 30.

Participation in high school sports is not without risk. The student-athlete and parent/guardian acknowledge truthful answers to the above questions allows for a trained clinician to assess the individual student-athlete against risk factors associated with sports-related injuries and death. Florida Statute 1006.20 requires a student candidate for an interscholastic athletic team to successfully complete a preparticipation physical evaluation as the first step of injury prevention. This preparticipation physical evaluation shall be completed each year before participating in interscholastic athletic competition or engaging in any practice, tryout, workout, conditioning, or other physical activity, including activities that occur outside of the school year.

We hereby state, to the best of our knowledge, that our answers to the above questions are complete and correct. In addition to the routine physical evaluation required by Florida Statute 1006.20, and FHSAA Bylaw 9.7, we understand and acknowledge that we are hereby advised that the student should undergo a cardiovascular assessment, which may include such diagnostic tests as electrocardiogram (ECG), echocardiogram (ECHO), and/or cardio stress test. The FHSAA Sports Medicine Advisory Committee strongly recommends a medical evaluation with your healthcare provider for risk factors of sudden cardiac arrest which may include the special tests listed above.

Part 1: Student Acknowledgement and Release (to be signed by student at the bottom)

I have read the (condensed) FHSAA Eligibility Rules printed on page 5 of this "Consent and Release from Liability Certificate" and know of no reason why I am not eligible to represent my school in interscholastic athletic competition. If accepted as a representative, I agree to follow the rules of my school and FHSAA and to abide by their decisions. I know that athletic participation is a privilege. I know of the risks involved in athletic participation, understand that serious injury, including the potential for a concussion, and even death, is possible in such participation, and choose to accept such risks. Should I be 18 years of age or older, or should I be emancipated from my parent(s)/guardian(s), I hereby release and hold harmless my school, the schools against which it competes, the school district, the contest officials, and FHSAA of any and all responsibility and liability for any injury or claim resulting from such athletic participation and agree to take no legal action against the FHSAA because of any accident or mishap involving my athletic participation. I hereby authorize the use or disclosure of my individually identifiable health information should treatment for illness or injury become necessary. The released parties, however, are under no obligation to exercise said rights herein. I understand that the authorizations and rights granted herein are voluntary and that I may revoke any or all of them at any time by submitting said revocation in writing to my school. By doing so, however, I understand that I will no longer be eligible for participation in interscholastic athletics.

Sudden Cardiac Arrest Information

Sudden cardiac arrest (SCA) is a leading cause of sports-related death. Sudden cardiac arrest (SAC) occurs when the heart suddenly and unexpectedly stops beating. When this happens blood stops flowing to the brain and other vital organs. SCA is NOT a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction in the heart's electrical system, causing the heart to suddenly stop beating. SCA can cause death if it is not treated within minutes.

How common is sudden cardiac arrest in the United States?

There are about 350,000 cardiac arrests that occur outside of hospitals each year. More than 10,000 individuals under the age of 25 die of SCA each year. SCA is the number one killer of student-athletes and the leading cause of death on school campuses.

Are there warning signs?

Although SCA happens unexpectedly, some people may have signs or symptoms, such as but not limited to dizziness or light-headedness, fainting, shortness of breath, racing or skipped beats/palpitations, fatigue, weakness, chest pain/pressure or tightness. These symptoms may occur before, during, or after activity. These symptoms can be unclear and confusing in athletes. Some may ignore the signs or think they are normal results of physical exhaustion. If the conditions that cause SCA are diagnosed and treated before a life-threatening event, sudden cardiac death can be prevented in many young athletes.

What are the risks of practicing or playing after experiencing these symptoms?

There are significant risks associated with continuing to practice or play after experiencing these symptoms. The symptoms might mean something is wrong and the athlete should be checked before returning to play. When the heart stops due to cardiac arrest, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just a few minutes. Most people who experience a SCA die from it; survival rates are below 10%.

FHSAA Sports Medicine Advisory Committee strongly recommends a medical evaluation with your healthcare provider for risk factors of sudden cardiac arrest, which may include an electrocardiogram.

The FHSAA Sports Medicine Advisory Committee works to help keep student-athletes safe while practicing or playing by providing education about SCA and by notification to parents that you can request, at your expense, an electrocardiogram (EKG or ECG) as part of the annual preparticipation physical examination to possibly uncover hidden heart issues that can lead to SCA.

Why do heart conditions that put youth at risk go undetected?

- Publications report up to 90% of underlying heart issues are missed when using only the history and physical exam;
• Most heart conditions that can lead to SCA are not detectable by listening to the heart with a stethoscope during a routine physical; and
• Often, youth do not report or recognize symptoms of a potential heart condition.

What is an electrocardiogram (ECG or EKG)?

An ECG/EKG is a quick, painless, and noninvasive test that measures and records a moment in time of the heart's electrical activity. Small electrode patches are attached to the skin of your chest, arms, and legs by a technician. An ECG/EKG provides information about the structure, function, rate, and rhythm of the heart.

Why request an ECG/EKG as part of the annual preparticipation physical examination?

Adding an ECG/EKG to the history and annual preparticipation physical exam can suggest further testing or help identify heart conditions that can lead to SCA. An ECG/EKG can be ordered by your family healthcare provider from screening for cardiovascular disease or for a variety of symptoms such as chest pain, palpitations, dizziness, fainting, or family history of heart disease.

- ECG/EKG screenings should be considered every 1-2 years because young hearts grow and change.
• ECG/EKG screenings may increase sensitivity for detection of undiagnosed cardiac disease but may not prevent SCA.
• ECG/EKG screenings with abnormal findings should be evaluated by trained physicians.
• If the ECG/EKG screening has abnormal findings, additional testing may need to be done (with associated cost and risk) before a diagnosis can be made and may prevent the student from participating in sports for short period of time until the testing is completed, and more specific recommendations can be made.
• The ECG/EKG can have false positive findings, suggesting an abnormality that does not really exist (false positive findings occur less when ECG/EKGs are read by a medical practitioner proficient in ECG/EKG interpretation of children, adolescents, and young athletes).
• ECG/EKGs result in fewer false positives than simply using the current history and physical exam.

The American College of Cardiology/American Heart Association guidelines do not recommend an ECG or EKG in asymptomatic patients but do support local programs in which ECG or EKG can be applied with high-quality resources.

Removal from play/return to play

Any student-athlete who has signs or symptoms of SCA should be removed from play (which includes all athletic activity). The symptoms can happen before, during, or after activity. Before returning to play, the athlete shall be evaluated and cleared. Clearance to return to play must be in writing. The evaluation shall be performed by a licensed physician, certified registered nurse practitioner, or cardiologist (heart doctor). The licensed physician or certified registered nurse practitioner may consult any other licensed or certified medical professionals.

Heat-Related Illness Information

Heat-related illness is a cause for concern for student-athletes who participate in high school sports in Florida. Especially vulnerable are those students who participate in conditioning and practices in the summer months and other times of extreme heat. Student-athletes suffer heat-related illness when their bodies cannot properly cool themselves by sweating. Sweating is the body's natural air conditioning, but when a person's body temperature rises rapidly, sweating just is not enough. Heat-related illnesses can be serious and life-threatening. Very high body temperatures may damage the brain or other vital organs and can cause disability and even death. Heat-related illnesses and deaths are preventable.

What are some common heat-related injuries in sports?

Exertional Heat Stroke (EHS): EHS is the most serious heat-related illness. EHS is a medical emergency. It happens when the body's temperature rises quickly, and the body cannot cool down. Student-athletes can die or become permanently disabled from EHS if not properly recognized and managed. EHS is one of the leading causes of death in young athletes, especially in Florida. The two main criteria for diagnosing EHS are rectal temperature >105F (40.5C) immediately post collapse and central nervous system (CNS) dysfunction. There are many signs and symptoms associated with EHS. Parents and student-athletes should familiarize themselves with these by viewing the free video resources provided by the National Federation of High School Sports (NFHS) or the FHSAA.

- EHS is preventable by taking the proper precautions and understanding the symptoms of someone who has become ill due to heat.
EHS is survivable when quick action is taken by staff members that includes early recognition of symptoms and aggressive cold-water immersion.

Heat Exhaustion (EHI): Heat exhaustion is the most common heat-related condition observed in active populations including student-athletes. EHI is a type of heat-related illness. EHI is defined as the inability to continue exercise in the heat because the heart has difficulty providing enough oxygenated blood to all the working organs and muscles. It usually develops after several days practicing or conditioning in high temperature weather and not drinking enough fluids.

Heat Cramps: Heat cramps are painful, involuntary cramping often in the legs, arms, or abdomen with muscle contraction. Cramping usually occurs in the preseason conditioning phase when the body is not properly conditioned and more subject to fatigue. Heat cramps can easily be treated with rest, stretching of the muscle, and replacement of fluid and electrolytes. The exact mechanism of muscle cramps in warm environmental conditions is unknown but can be caused acutely by extensive dehydration and sodium losses or chronically via inadequate electrolytes in the athlete's diet. Although heat cramps are not a cause of sudden death, it can be confused with the more serious condition, exertional sickling.

Is my student at risk?

Yes, all student-athletes are vulnerable to exertional heat stroke and other heat-related injuries. While every student-athlete can succumb to EHS, newer data is reporting a high incidence of exertional heat stroke cases in football players, especially those who play the lineman position and in very lean distance runners. Research also states many reports of EHS emergencies are during summertime or preseason conditioning sessions. Other conditions that can increase your risk for heat-related illness include obesity, fever, dehydration, poor circulation, sunburn, and prescription drug or alcohol use.

What is the FHSAA doing to keep my student safe?

The FHSAA has published Policy 41, titled "Exertional Heat Illness". This policy provides specific procedures for schools to educate student-athletes and parents on EHI as well as strategies to prevent these injuries. FHSAA Policy 41 also provides procedures for schools to follow for preseason acclimatization, environmental monitoring, and the inclusion of cooling zones for the management of a student-athlete suffering from a heat injury.

How can I help to keep my student safe when it comes to the heat?

- Learn more about heat-related injuries in sports at https://www.nfhs.org/media/1015695/ksi-5-pillars-of-exertional-heat-stroke-prevention-2015.pdf
Discuss nutrition, proper hydration, body weight, and the importance of sleep and rest with your family healthcare provider at the time fo the sports physical
Talk to your school and coach about safeguards they have in place to keep kids safe in the heat and what they will do for someone who becomes ill or injured
Monitor fluid intake of your student while at home and routinely check in with your student-athlete to inquire about how they feel
Report any concerns with your school's athletic trainer, team physician, coach, or your family healthcare provider
