

Advancement Via Individual Determination (AVID)

In 2012-13, we were able to complete the implementation of AVID in all traditional secondary schools in the county (16 high schools and 19 middle schools), bringing us to 35 secondary schools that are implementing AVID.

The total number of students enrolled in the AVID elective has increased from 2596 in 2011-2012 to 3470 in 2012-2013.

Black students are overrepresented in the AVID elective with 871 or 25.1% of AVID elective participants being black. This percentage exceeds the combined percentage of black students enrolled at the AVID schools which is only 18.3%.
